GOVERNMENT INTEREST LETTER

Invitation to host a test track

To the Minister or Director-General responsible for transport

Dear Minister or Director-General,

Hyperloop Alpha invites your authority to open an exploratory discussion about hosting a closed, uncrewed hyperloop test track. Our purpose is to establish whether faster travel between cities could deliver a meaningful saving over the whole journey.

We propose to begin with questions that a host can independently review. How much power does the facility use to establish and hold tube pressure? How consistently can a research vehicle stop within an agreed distance? How quickly can emergency crews reach it after a controlled shutdown?

If this work aligns with your transport or research priorities, please identify a lead public authority and a technical point of contact. An initial briefing can proceed before your authority nominates land. If you already have a location in mind, a region and a brief description will suffice.

At that meeting we would discuss the questions your authority wants answered, candidate facilities, oversight and access to the results. If both parties see grounds to proceed, a written study scope would set out responsibilities, deliverables and proposed costs for review.

An expression of interest is non-binding. Any funding, land allocation, procurement, regulatory permission or construction would require separate decisions by the competent authorities.

Yours faithfully,

Hyperloop Alpha
